- United Nations Declaration on the Rights of Indigenous Peoples (2007).
- Lowitja Institute. Supporting Indigenous Researchers: A practical guide for Supervisors (2009).
- Lowitja Institute. Researching Indigenous Health: A practical guide for Researchers (2011).

Community and Organisational Protocols

Researchers should be aware that the NHMRC, AIATSIS and other Guidelines for conducting ethical research with Aboriginal and/or Torres Strait Islander Peoples are general guidelines and that each community, organization or group may have specific ethical requirements based on their world views, cultural values and beliefs and local geographical context. Establishing a respectful and effective working relationship with key stakeholders at the local level is essential to ensure ethical standards are met.
